Task management with a difference

Global Tasks is the task management solution that helps you stay on top of your work and in control of what you need to do.

Designed specifically with dyslexia, mental health and neurodiversity in mind, Global Tasks lets you see the big picture, hide the noise and focus on your highest priority tasks.

Why do we need task management?

Managing multiple assignment deadlines, remembering when to pay bills, understanding what the highest priority is can be overwhelming. We spoke to students receiving DSAs, to find out how they manage their workload. **Here's what they said:**

“

“When I have lots to do, I just don't know what's most important.”

“I write some important things down at uni, and when I get home, I can't remember what I need to do.”

“I know some of the things I should be working on, but there are other tasks I can't remember, and I don't know if they're urgent.”

”

How does it help?

“The structure and support that Global Tasks gives the student is making a real difference in their life.”

Needs Assessor, Wales

1 See the big picture

See all your projects visually organised in one place, at a glance. Zoom in and out to see the right level of detail.

2 Hide the noise

Improve your focus by temporarily hiding tasks you don't need to see. They'll be remembered for you and reappear at the time you set.

3 Always in sync

All of your tasks stay seamlessly in sync across your computer and phone, so you can update and check your tasks anywhere.

Who is it for?

Global Tasks supports anyone who struggles with managing and organising their workload. It can be due to memory issues, lack of concentration or difficulty prioritising, which often occur in conditions such as:

depression
fatigue **anxiety**
dyspraxia **dyslexia**

“As soon as I put my tasks into the app, my brain felt emptier, as my thoughts were stored and organised somewhere else, and I didn’t have to hold onto them anymore, which lessened my anxiety.”

Caroline, Teacher, UK

**Focus on your
writing, not the
red underlines**

**Global
AutoCorrect™**

from **LexAble®**

Global AutoCorrect™

Automatic spelling correction as you type

Global AutoCorrect is:

A comprehensive and discreet software solution that automatically corrects spelling errors in any program, as you type.

With over 130 subject specific dictionaries included, Global AutoCorrect will recognise and correct advanced terminology, no matter what subject you're writing about.

Running silently in the background and removing the stop-start effect of correcting mistakes - Global AutoCorrect is an essential productivity tool that helps you focus on the content and flow of writing, saving you time and energy.

Don't let spelling slow you down

Simply install Global AutoCorrect and keep your work moving forward.

1 Increase your productivity and save energy

Reduce the distraction of errors, red underlines, and spelling decisions so you can focus on your ideas.

2 Improve your writing confidence

Remove the focus on errors and spelling, and develop better self-confidence, self-esteem, and positive self-talk.

3 Simple to use and works automatically with nothing new to learn

Global AutoCorrect starts correcting your spelling as soon as it's installed. It works quietly and intuitively in the background, with no unnecessary interruptions.

Who does it help?

Global AutoCorrect is an invaluable tool for anyone who has difficulty spelling. It's ideal for those with working memory issues, have difficulty concentrating, are distracted by errors and red underlines or lack of confidence with writing, which can occur in conditions **such as:**

anxiety **OCD** **dyslexia**
dyspraxia **depression** **hearing loss**
visual impairment **RSI** **fatigue**

Proven results!

Dr Trevor Humby of Cardiff University's School of Psychology carried out an independent study to measure the benefits of Global AutoCorrect. His research showed that Global AutoCorrect improved dyslexic students' information recall by 18%, which brings them in line with their non-dyslexic peers.

This research was published in the distinguished academic journal, 'Dyslexia'.
